

Who is SupportCommunity

The two founders of Support Community—Dr. Pat Morrison and Dr. Susan Regas—spent a combined 16 years working with Ronald McDonald Houses and their families. Their dream was to extend the same level of support, guidance, and community to families and patients that they get at the house both *before* and *after* their stay.

How Can Homes Leverage Support Community?

Support Community is designed to provide a custom implementation for each house, complete with information about staff, events, contact information and more. Each house can connect into a partnership community of your choice, so that families in need can find help and connections locally or anywhere in the Healthcare Home community.

What is the Benefit to your Home?

We believe that houses will benefit by leveraging Support Community. It breaks the physical constraints of your home, enabling the support system to extend to far more families and for a far longer period of time. By extending your reach, by helping more families, we believe that this is an ideal platform for fund-raising. Companies and families can sponsor their local house site or sections of the local site. Beyond the fundraising capabilities, you will be able to further your House's mission to provide programs that directly improve the well-being of the families you serve.

What is Support Community

Support Community was designed to provide a continuity of care to Hospitality Home families. It connects families, patients, staff, Support Services and volunteers in an online community that provides the following:

Discover and connect with people who have experienced similar health challenges;

Share your health story, invite others to share their perspective, and even publish it on Facebook if desired;

Provides the latest research, news and resources about your specific health challenges;

Find help, insight and guidance from peers, volunteers or experts via chat or video conference built right in the social community;

Ask questions and get answers from the community (peers, experts, etc.);

Discover and participate in House events and fund-raisers.

How Do I Get Started?

Contact Dr. Patrick Morrison
pmorrison@supportcommunity.com and we'll set-up a demo and walk you through the process for getting a custom Support Community for your house.
